He previously served as Technical Director for Joint and Defense-Wide Command, Control, and Communications at the MITRE Corporation. He is an experienced manager, strategic planner, and command, control, communications, computers, intelligence, surveillance, and reconnaissance (C<sup>4</sup>ISR) systems engineer with extensive experience in nuclear C<sup>2</sup>, continuity of government C<sup>2</sup>, multinational military C<sup>2</sup> and command, control, communications, and intelligence systems interoperability, civil-military operations and information operations support to peace operations, and numerous other military C<sup>4</sup>ISR activities.

***CONTRIBUTING AUTHORS***

**Charles L. Barry** is a Senior Research Fellow in the Center for Technology and National Security Policy at the National Defense University. He is also the principal of Barry Consulting, a strategic planning, national security, and information management firm. Dr. Barry's career in the U.S. Army included operational leadership positions and 9 years as a high-level strategic planner in Europe and Washington. His research covers command and control networks, multinational forces, and civil-military organizational design.

**Marjory S. Blumenthal** has been Associate Provost, Academic, at Georgetown University since August 2003. Between July 1987 and August 2003, she was the Executive Director of the National Academy of Sciences' Computer Science and Telecommunications Board, where she designed, directed, and oversaw collaborative study projects, workshops, and symposia on technical and policy issues in computing and telecommunications. Ms. Blumenthal has taught and advised students on Internet policy, an area where she continues to pursue

personal research.

**Chris Burrow** was a Research Associate with Zeichner Risk Analytics when this book was written.

**Gerard J. Christman** is a Program Manager with Femme Comp Incorporated (FCI) supporting the Assistant Secretary of Defense for Networks and Information Integration. He served 23 years as an officer in the U.S. Army Signal Corps before joining FCI in 2003.

**David D. Clark** has been leading the development of the Internet since the 1970s. From 1981 to 1989, he was Chief Protocol Architect in this development and chaired the Internet Activities Board. He is a former chairman of the Computer Science and Telecommunications Board of the National Research Council and is a Senior Research Scientist at the Massachusetts Institute of Technology.

**Maeve Dion** is a Program Manager at the Critical Infrastructure Protection Program at George Mason University School of Law.

**Leon Fuerth** is Research Professor of International Affairs at The George Washington University's Elliot School of International Affairs. He was the national security advisor to Vice President Al Gore and served on the Principals' Committee of the National Security Council.

**Daniel T. Kuehl** teaches military strategy and national security policy at the Information Resources Management College at the National Defense University. He is the Director of the Information Strategies Concentration Program, a specialized curriculum on the information component of national power, offered to select students at the National War College and the Industrial College of the Armed Forces.

**Richard L. Kugler** is a former Distinguished Research Professor in the Center for Technology and National Security Policy at the National Defense University. His specialty is U.S. defense strategy, global security affairs, and the North Atlantic Treaty Organization (NATO). Dr. Kugler advises senior echelons of the Office of the Secretary of Defense, the Joint Staff, and the interagency community. He is the author of multiple books, articles, and official studies on

U.S. defense strategy and programs as well as NATO and global security affairs. **Harold Kwalwasser** is an independent telecommunications consultant based in Washington, DC. He is Chair of the U.S. International Telecommunication Union Association, an organization of telecommunications-related companies and consultancies that have an interest in the operation of the International Telecommunication Union. Previously, Mr. Kwalwasser practiced law for 16 years.

**Irving Lachow** is a Senior Research Professor at the Information Resources Management College at the National Defense University, where he teaches courses on information assurance and critical infrastructure protection, international perspectives in information operations,

global enterprise networking, and telecommunications. Dr. Lachow has also worked for Booz Allen Hamilton, the RAND Corporation, and the Office of Deputy Under Secretary of Defense (Advanced Systems and Concepts).

**Martin C. Libicki** has been a Senior Policy Analyst at RAND since 1998, where he works on the relationship between information technology and national security. Previously, he was a senior fellow in the Institute for National Strategic Studies at the National Defense University for 12 years. Dr. Libicki has written on information technology standards, the revolution in military affairs, and information warfare.

**John A. McCarthy** was Director of the Critical Infrastructure Protection Program (now the Center for Infrastructure Protection) at George Mason University School of Law when this book was written. The center integrates law, policy, and technology to conduct comprehensive infrastructure protection research relevant to domestic and international security, providing critical infrastructure stakeholders with valuable analysis of the cyber, physical, human, and economic frameworks of U.S. critical infrastructures.

**William D. O'Neil** is a private consultant and author. He has served as a naval officer and civilian official in the Department of Defense as well as an engineer and executive in private industry.

**Olivia Pacheco** is Editor of *The CIP Report* at the Center for Infrastructure Protection at George Mason University School of Law.

**Gregory J. Rattray** is a Partner at Delta Risk Consulting, where he establishes risk management strategies and cyber security capacity-building approaches for government and private sector clients. During 23 years as a U.S. Air Force officer, he served on the White House National Security Council Staff as Director for Cyber Security, leading national policy development and National Security Council oversight for cyber security, and he directed oversight of Iraqi telecommunications reconstruction. He is a full member of the Council on Foreign Relations.

**Edward Skoudis** is a founder of and Senior Security Consultant for Intel-guardians Network Intelligence, LLC, a Washington, DC-based network security consulting firm. He is also a handler at the SANS Internet Storm Center. His expertise includes hacker attacks and defenses, the information security industry, and computer privacy issues. He has performed numerous security assessments, designed information security governance and operations teams for Fortune 500 companies, and responded to computer attacks for clients in financial, high technology, health care, and other industries.

**Timothy L. Thomas** is a senior analyst at the Foreign Military Studies Office at Fort Leavenworth, Kansas. Before retiring from the U.S. Army as a lieutenant colonel in 1993, he was a Foreign Area Officer who specialized in Soviet/Russian studies. Mr. Thomas has done extensive research and publishing in the areas of peacekeeping, information war, psychological operations, low-intensity conflict, and political military affairs.

**Clay Wilson** retired as a Research Specialist in Technology and National Security in

the Foreign Affairs, Defense, and Trade Division of the Congressional Research Service (CRS). Previously, he taught computer security and risk analysis at the University of Maryland University College and at National- Louis University. Dr. Wilson served as a government representative to the Critical Infrastructure Coordination Group to improve industry and government cooperation under U.S. Presidential Decision Directive 63.

**Thomas C. Wingfield** is an Associate Professor at the Fort Belvoir, Virginia, campus of the U.S. Army Command and General Staff College. He is also a Lecturer in Law at the Catholic University of America's Columbus School of Law, an Adjunct Research Fellow at the Potomac Institute of Policy Studies, and an Adjunct Professor at the Georgetown Public Policy Institute. A national security attorney, Mr. Wingfield specializes in use-of-force issues, specifically the application of the law of armed conflict to information operations.

**Elihu Zimet** is a former Distinguished Research Fellow in the Center for Technology and National Security Policy at the National Defense University. Previously, Dr. Zimet headed the Expeditionary Warfare Science and Technology Department at the Office of Naval Research, where he directed science and technology programs in missiles, directed energy, aircraft, and stealth as well as science and technology support to the Marine Corps.
